

## **12 Month Old Speech Pathology Child Checklist**

A 12 month old may need to see a speech pathologist if he/she:

- Is not babbling
- Does not say 2 or 3 words (other than mama and dada)
- Does not imitate familiar words
- Does not understand simple instructions (e.g. 'come here', 'don't touch')
- Does not recognise simple words such as 'cup', 'shoe', 'juice'
- Cannot point to simple objects in books (e.g. "where's the ball?")
